

Alljoints

**EQUINE MUSCULO-SKELETAL JOINT NUTRITION
ASSISTS IN IMPROVING JOINT HEALTH IN HORSES**

Supports Cartilage Metabolism and Repair

Joint Care That Adds Up

Collagen Hydrolysate + Free-Form Amino Acids + Glucosamine = the Major Building Blocks of
 • **Hyaluronic Acid (HA)** • **Glycosaminoglycans (GAGs)** • **Proteoglycans (PGs)**

Healthy Joint

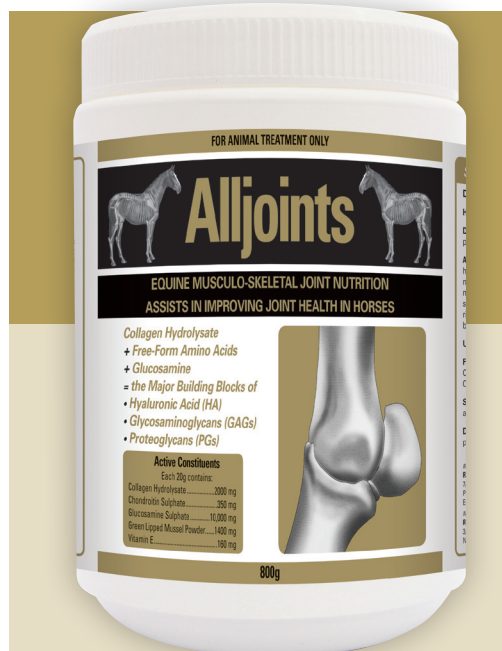

Arthritic Joint

Alljoints: Equine health, well-being and soundness are prime concerns for owners, trainers and veterinarians. The management of joint health requires the ongoing supply of the correct nutrients for joint maintenance and repair.

Alljoints is a major advance in our ability to protect joint integrity and reduce the impact of the demands of growth and development, exercise and aging on the horse's joints.

Alljoints has been especially formulated to meet these demands.

Active Constituents

Each 20g contains:

Collagen Hydrolysate	2000 mg
Chondroitin Sulphate.....	350 mg
Glucosamine Sulphate	10,000 mg
Green Lipped Mussel Powder.....	1400 mg
Vitamin E.....	160 mg

Collagen Hydrolysate: The fundamental protein of cartilage, bone, tendons and ligaments - with a central role in the synthesis, repair and maintenance of joint cartilage.

Chondroitin Sulphate: Provides substrate for formation of healthy joint matrix.

Glucosamine Sulphate: Essential for the formation of proteoglycans, one of the key components of joint cartilage. Important in maintaining normal joint lubrication.

Green Lipped Mussel Powder: Anti-inflammatory properties that reduce joint inflammation, pain and stiffness and improve mobility.

Vitamin E: Nature's own antioxidant offering protection against free radical damage.

Free-form amino acids providing the basic amino acid building blocks for the essential components of the joint such as joint cartilage, joint capsule and ligaments.

Directions for Use

Administer 20g (1 scoop) Alljoints daily mixed into the feed.

Alljoints is a major advance in our ability to protect joint integrity and reduce the impact of age and exercise on the equine musculoskeletal system.

Alljoints has become a valuable strategy in the maintenance of joint health in horses. **Daily** supplementation with **Alljoints** provides the nutrients that ensure joint cartilage is nourished, supported and maintained in the best possible condition - enabling the horse to sustain a willing attitude and giving the rider, trainer, owner and treating veterinarian the confidence that the best possible care is being provided.

User Safety Information: Avoid inhalation of dust.
